PROBLEM STATEMENT

- **Expense Tracker with Reporting:** Allows users to record their expenses and generate reports by category and date. (RDBMS: Expenses, Categories; Backend: Expense entry, data filtering and reporting).

OVERVIEW

- The Expense Tracker with Reporting is a web-based application designed to help users record, categorize, and analyze their expenses efficiently.
- It provides detailed financial reports by category, date range, and payment method, enabling users to track spending habits, manage budgets, and make informed financial decisions.

DATA MODULES

- User Authentication Module
- Expense Recording Module

USER AUTHENTICATION MODULE

- User registration (email/password)
- Secure login/logout
- Password reset functionality
- Session management

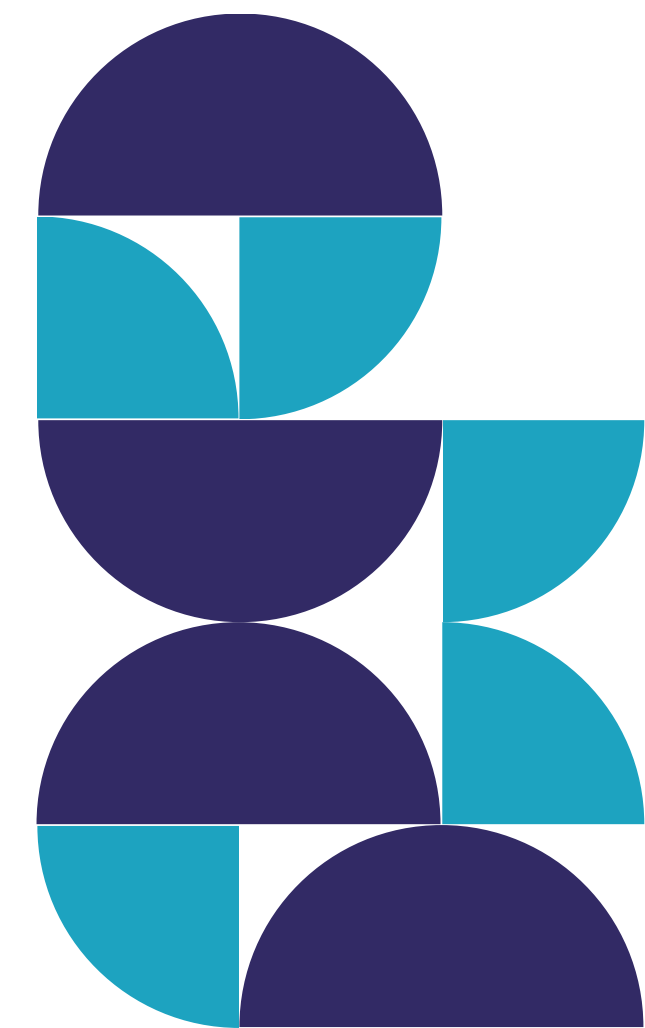

EXPENSE RECORDING MODULE

- Add expenses (amount, category, date, payment method)
- Edit/delete past expenses

TECH STACK

- Frontend : HTML, CSS, Javascript
- Backend : PHP
- Database : MySQL
- Deployment : XAMPP (for local testing)

DATA MODEL
